GENERAL DESCRIPTION

DS2100N and DS2400N are designed to offer ease of use combined with excellent reading performance.

Typical applications are in automated warehousing (conveyor sorting and picking systems), automated shop floor (for items and parts tracking), process control and packaging. In OEM integration these scanners are suitable for integration into automatic machinery (chemical and biomedical analysis machines) and in packaging and document handling machines.

These scanners guarantee high reading performance thanks to the high performance optics and ACR-Lite code reconstruction technology.

DS2100N and DS2400N are equipped with the innovative X-PRESS™ Human Machine Interface, granting easy scanner installation and maintenance. This interface clearly presents status and diagnostic information by means of a five LED bar graph, while the single multi-function key gives immediate access to relevant functions such as Test Mode, Auto Learn and Auto Setup.
